Reserve (billion barrels)	Province	Opportunity for investmen										
5.14	East Kalimantan	Indonesia oil reserve is declining every year that it is predicted that it will exhaust in 20 years time, meaning that Indonesia will solely rely on oil import despite the fact that at present, Indonesia is the world biggest producer and exporter. It is expected that the amount of Indonesia gas reserve is 266 trillion cubic feet(tcf) with recoverable reserve as much as 155 tcf. In addition to North Sumatera and Natuna Sea, East Kalimantan has a gigantic LNG reservoir. It was also announced that a new reservoir in Irian Jaya has been found.
