<b>Reserve Aluminium &amp; Bauxite</b>										
West Kalimantan & Bintan	mineral resources 112 million ton									
<b>Opportunity for Investment</b>	<p>It is found of bauxite. The metal is used in manufacture sector. Indonesia aluminium production has a positive trend which aluminium ingot has the biggest share of production. Its share is about 72% per year. While exporting aluminium to other countries, Indonesia also importing aluminium from others.</p> <p>Top 5 country destination of aluminium eksport from Indonesia are Japan, USA, Malaysia, Singapore and Phillipines. And top 5 country of origin for aluminium import to Indonesia are Australia, China, UEA, South Korea, and Russia.</p> <p>Indonesia both eksport and import trend have a positive trend, not only for quantity but also for its value.</p>
